

1. Check Positive Number

Program:-

```
public class Hello {  
    public static void main (String [] args) {  
        int n=5;  
        if (n > 0) {  
            System.out.println ("Number is Positive");  
        }  
        else {  
            System.out.println ("Number is non positive");  
        }  
    }  
}
```

2. Check Negative Number.

```
public class Neg {
```

```
    public static void main (String args[]) {
```

```
        int n = -5;
```

```
        if (n < 0) {
```

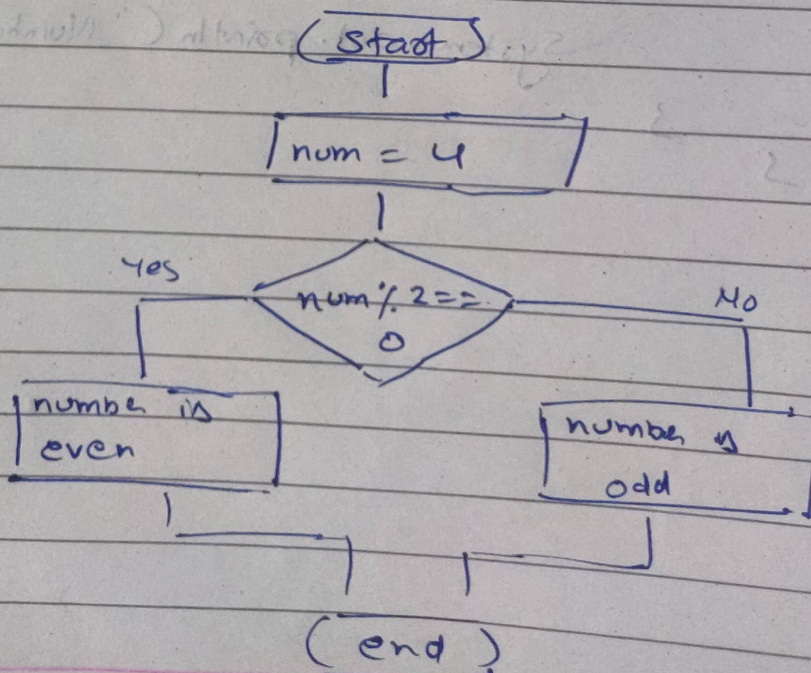

```
            System.out.println("number is negative");
```

```
        }
```

```
    } else {
```

```
        System.out.println("number is pos non negative");
```

3. Check odd or Even num.

public class Check {

public static void main (String args[]) {

int num = 4;

if (num % 2 == 0) {

System.out.println ("Number is even");

} else {

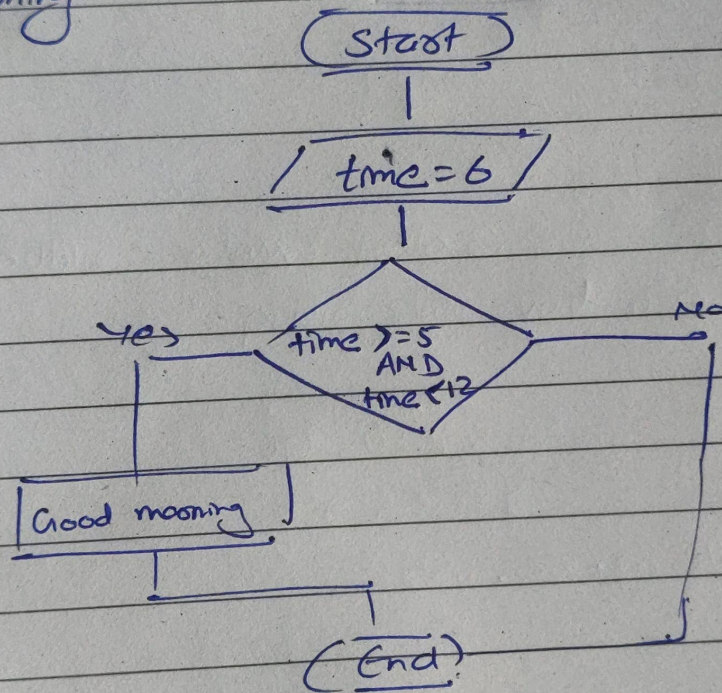

System.out.println ("Number is odd");

}

}

}

4) Good morning.

Public class ~~main~~ Morning {

public static void main (String args[]) {

int time = 8;

if (time >= 5 & time < 12) {

System.out.println ("Good morning");

}

}

}

5)
